

March 15, 2019

To Our Valued Customers:

Beacon has received price increase announcements from many of our roofing suppliers, to include both residential and commercial products. These cost increases are due to increases in raw material, production and transportation costs. Therefore, effective April 15, 2019, we will be implementing price increases ranging from 4% to 7% for all roofing materials and accessories.

To prepare your organization for this inflationary environment, we encourage you to incorporate these increases into your bidding and quoting. As always, Beacon is committed to working closely with our customers to help manage through these price increases. To assist you in that regard, your Beacon representative will be contacting you to provide up-to-date information and answer any questions you may have.

We recognize that you have a choice when it comes to suppliers, and as a result, we greatly appreciate your business. We remain committed to providing exceptional service while maintaining consistent and competitive pricing.

Thank you for your continued partnership.

Sincerely,

Paul Isabella
President and CEO
Beacon Roofing Supply
